Notes:

1) Any deviation from these standards must be the subject of an approved variance.
2) Lots that are restricted by plat note to one single-family residence shall be presumed to generate 10 one-way trips per day. Average
daily traffice for all other lots determined on a case-by-case basis by the Design Engineer Subget to approval by the County.
3) Slopes for occasional short runs between intersections may exceed the percentages shown above, but maximum slopes through intersections ma
4) No cul-de-sac shall have a cross-slope in excess of $6 \%$.
5) Revegetation of distributed areas within new road rights-of-way is required prior to final acceptance by the County.
6) Guardrail shall be designed in accordance with TXDot Standards
7) See Flexible Pavement Design Criteria attached for road requirements.
