

ATASCOSA COUNTY JUDGES REPORT

The entire county is grieving with Donna Prasifka, the boys and the grandchildren over the terrible loss of our Atascosa County Emergency Management Coordinator. As I stated to the paper – the county judge is the constitutional emergency manager for the county. Counties large enough hire designated County Emergency Management Coordinators (which is what David was) to run the emergency systems on the behalf of the judge. So, you can see that I spent a lot of time with David and got to know him pretty well as a co-worker. Until I became County Judge I really did not know him well. I remember his father and his uncles who ran Alvin's Garage in Jourdanton. They came into Hurley Auto Parts frequently going back to when I was very young. David's grandmother, Juanita, was on a ladies bowling team with my mother. She was older and my mother really looked up to her. She loved bowling with her, too. My heart hurts for the Prasifka family with this tragic loss. I write this to you from home because I have tested positive for COVID-19. I feel fine at this point, but must remain here nine more days unless I develop symptoms that put me under a doctor's care for treatment. I will be moving computers and phones to my house so I can work. I will be conducting court by "Zoom" meetings.

The Bus (shuttle) between the Tri-City areas is still moving along. There is a tentative route running now that is no charge.

Quote of the week: "You know you have reached middle age when you are told to slow down and it is by your doctor and not a policeman." Joan Rivers.

Thanks for listening.

We want you to be proud of your County Government.
